

A Partnership Proposal for Contoso

Scaling Contoso's cloud, data and compliance agenda across EMEA

NStar Consulting partners with industrial and technology groups to turn ambitious transformation targets into measurable outcomes. This flyer sets out the services and packaged products we propose for Contoso Group over the next 12 months, together with the core team that would be dedicated to your account.

Proposed services

Cloud & Platform Modernisation

01

Migration roadmap for Contoso's legacy ERP estate, landing-zone design, FinOps guardrails and a 90-day pilot on two priority workloads.

Data & AI Enablement

02

Unified data platform, governance model and three AI use cases prioritised by value: demand forecasting, service triage and document intelligence.

Regulatory & ESG Reporting

03

CSRD-ready reporting architecture, control framework and assurance-grade data lineage for Contoso's EMEA entities.

Operating Model & Change

04

Target operating model, capability uplift for 400+ staff and a change programme to embed new ways of working across business units.

Why NStar for Contoso

18 yrs

advising industrial & technology groups

240+

consultants across 6 European offices

94%

of engagements repeat clients

€38m

documented client savings in 2025

How we would start

Weeks 1–4

Discover & align

Baseline assessment of the ERP, data and reporting estate, stakeholder interviews and a jointly agreed value case.

Weeks 5–12

Pilot & prove

Two priority workloads migrated, the lakehouse blueprint stood up and the first AI use case in controlled production.

Quarter 2+

Scale & embed

Wave-based rollout across EMEA entities, CSRD controls in place and capability transfer to Contoso teams.

NSTAR CONSULTING

Your dedicated team • Packaged products • Next steps

Your core team

Marianne Delacroix
Managing Partner

Leads the Contoso account; 20 years in industrial transformation.

Tomás Ferreira
Director, Cloud & Platforms

Owns the ERP migration and landing-zone design workstream.

Aisha Ncube
Senior Manager, Data & AI

Runs the data platform build and the three AI use cases.

Henrik Sandberg
Partner, Risk & ESG Reporting

Accountable for CSRD readiness and assurance quality.
