

A Partnership Proposal for [ENTITY_2]

Scaling [ENTITY_2]'s cloud, data and compliance agenda across EMEA

[ENTITY_1] Consulting partners with industrial and technology groups to turn ambitious transformation targets into measurable outcomes. This flyer sets out the services and packaged products we propose for [ENTITY_2] Group over the next 12 months, together with the core team that would be dedicated to your account.

Proposed services

Cloud & Platform Modernisation

01

Migration roadmap for [ENTITY_2]'s legacy ERP estate, landing-zone design, FinOps guardrails and a 90-day pilot on two priority workloads.

Data & AI Enablement

02

Unified data platform, governance model and three AI use cases prioritised by value: demand forecasting, service triage and document intelligence.

Regulatory & ESG Reporting

03

CSRD-ready reporting architecture, control framework and assurance-grade data lineage for [ENTITY_2]'s EMEA entities.

Operating Model & Change

04

Target operating model, capability uplift for 400+ staff and a change programme to embed new ways of working across business units.

Why [ENTITY_1] for [ENTITY_2]

18 yrs

advising industrial & technology groups

240+

consultants across 6 European offices

94%

of engagements repeat clients

€38m

documented client savings in 2025

How we would start

Weeks 1–4

Discover & align

Baseline assessment of the ERP, data and reporting estate, stakeholder interviews and a jointly agreed value case.

Weeks 5–12

Pilot & prove

Two priority workloads migrated, the lakehouse blueprint stood up and the first AI use case in controlled production.

Quarter 2+

Scale & embed

Wave-based rollout across EMEA entities, CSRD controls in place and capability transfer to [ENTITY_2] teams.

[ENTITY_1] CONSULTING

Your dedicated team • Packaged products • Next steps

Your core team

[PERSON_1]
